

Onshore Wind

Facility Type:	Project Finance & Long Funding Lease
Sector:	Renewable mid wind
Asset:	Wind Turbine portfolio
Value:	£10,000,000

Worked with a developer to build out a portfolio of projects on separate sites over a wide area.

The critical keys were to ensure the turbine manufacturer performance statistics were corroborated by due diligence on reference sites, and that the modelled wind report data overlaid with these were accurate and reliable.

Further to this, we continued portfolio monitoring and comparison actual to projected data to use for future reference.
